

Submersible drainage pumps for chemically polluted drainage water. Spherical clearance 10 mm.

CH413

Application

Pumps used for pumping drainage water which is polluted with alkaline or acid chemicals. With the advantage of thick wall casting and viton seals, they are the ideal solution to pump mediums with pH-value between 5-14. They are suitable for laundries, car washes, food industries and many other applications.

DIN EN 12050-2: Conformity and type-tested and monitored by the LGA.

Installation: Stationary or mobile.

Conveying medium: Clear water and domestic waste water, pH-value 5-14. Max. temperature of conveying medium: 40°C, briefly up to 60°C.

Operating mode: Motor submerged: continuous operation (S1). Motor not submerged or medium temperature 41 to 60 °C: Intermittent operation (S3 30%)

Construction

Fully submersible pump, consisting of:

Pump: Single stage centrifugal pump with horizontal discharge.

Impeller: Open multi-channel impeller, spherical clearance 10 mm.

Motor: Fully submersible, pressure tight electric motor, oil filled. Insulation class H. Degree of protection IP 68. Alternating current version with thermal sensor in the winding for temperature monitoring. Electrical compartment is separate from motor.

Connection cable W: H07RN8-F 4G1,5

Connection cable D: H07RN-F 4G1,5 with protection hose (polyolefine).

Shaft/Bearing: Generously-proportioned chromium steel motor shaft, permanently-lubricated roller bearing.

Seal: Combination of mechanical seal and radial seal that is independent of the direction of rotation.
